Wedge screw grips Type 8406 Fmax 50 kN, Type 8506 Fmax 100 kN, 150 kN and Type 8507 Fmax 250 kN, manual

CTA: 43071 40068

Type 8506 wedge-screw grips (manual), Fmax 150 kN

Type 8507 wedge-screw grips (manual), Fmax 250 kN

Applications

- Specimen material
Metals, plastics
- Specimen shape
Round and flat specimens
- Type of loading
Tensile

Function description

A handwheel is used to open and close the wedge screw grips, as well as apply closing force before the test. Switchable synchronization allows the grips to be set both symmetrically and asymmetrically.

The gripping force is generated via wedge action. The gripping force is proportional to the tensile force. The ratio is determined via the wedge angle.

A slot for the insertion of the T-slotted system is incorporated into this specimen grip type.

These specimen grips are also available in motorized versions.

Advantages and features

- Switchable synchronization enables symmetrical and asymmetrical specimen testing.
- Fast and easy insertion of specimen is enabled due to the ergonomic and open design.
- The jaws can be changed quickly and easily without tools if the application changes. The jaws are thus automatically centered.
- The specimen grip can be easily operated in the temperature chamber and quickly reaches its test temperature due to its low mass.
- accurate test results combined with a high number of cycles due to the adjustable centering stops for flat specimens
- You save time, by quickly and easily adapting small specimen grips and test tools to large specimen grips via the T-slotted system. Precise alignment ensures reliable test results.

Jaw mounting for type 8507

Description	Item number
Jaw mounting for hard metal jaws, Pr 0.7 mm, incl. centering stops	320036
Jaw mounting for hard metal jaws, Pr 0.7 mm, for round specimens	325573

Optional accessories

Connectors Type 8406 / Type 8506

Description	Item number
T-slotted shoe-connector with Connectors with M28 x 1.5 thread for connecting Ø8, 20, 36 mm mounting studs or load cells, centering spigot, Ø 30 H7, for connecting mounting unit, mounting flange or Ø 60 mm mounting stud 2 pieces	320252
T-slotted shoe connector for load cell calibration, Fmax 100 kN, with hole Ø 64/48 mm, included in delivery: 2 pieces	029093

Product Information

Wedge screw grips Type 8406 Fmax 50 kN, Type 8506 Fmax 100 kN, 150 kN and Type 8507 Fmax 250 kN, manual

Connectors type 8507

Description	Item number
Connectors with M28x1.5 thread for connecting Ø 8, 20, 36 mm mounting studs or load cells, centering gauge, Ø 30 H7, for connecting mounting unit, mounting flange or Ø 60 mm mounting stud. Scope of delivery: 2 pieces	318600
Mounting stud, Ø 60 mm only used with connectors. For connecting additional accessories. Scope of delivery: 1 piece	314062

Mounting unit and mounting flange Type 8406 / Type 8506 / Type 8507

Description	Item number
Mounting unit for connecting flexure tables, upper anvil holders and compression test kits	314058
Mounting flange (Fmax 250 kN) for connecting flexure tables.	314060
